Diabetes Mellitus: A “Thrifty” Genotype
Rendered Detrimental by “Progress”?

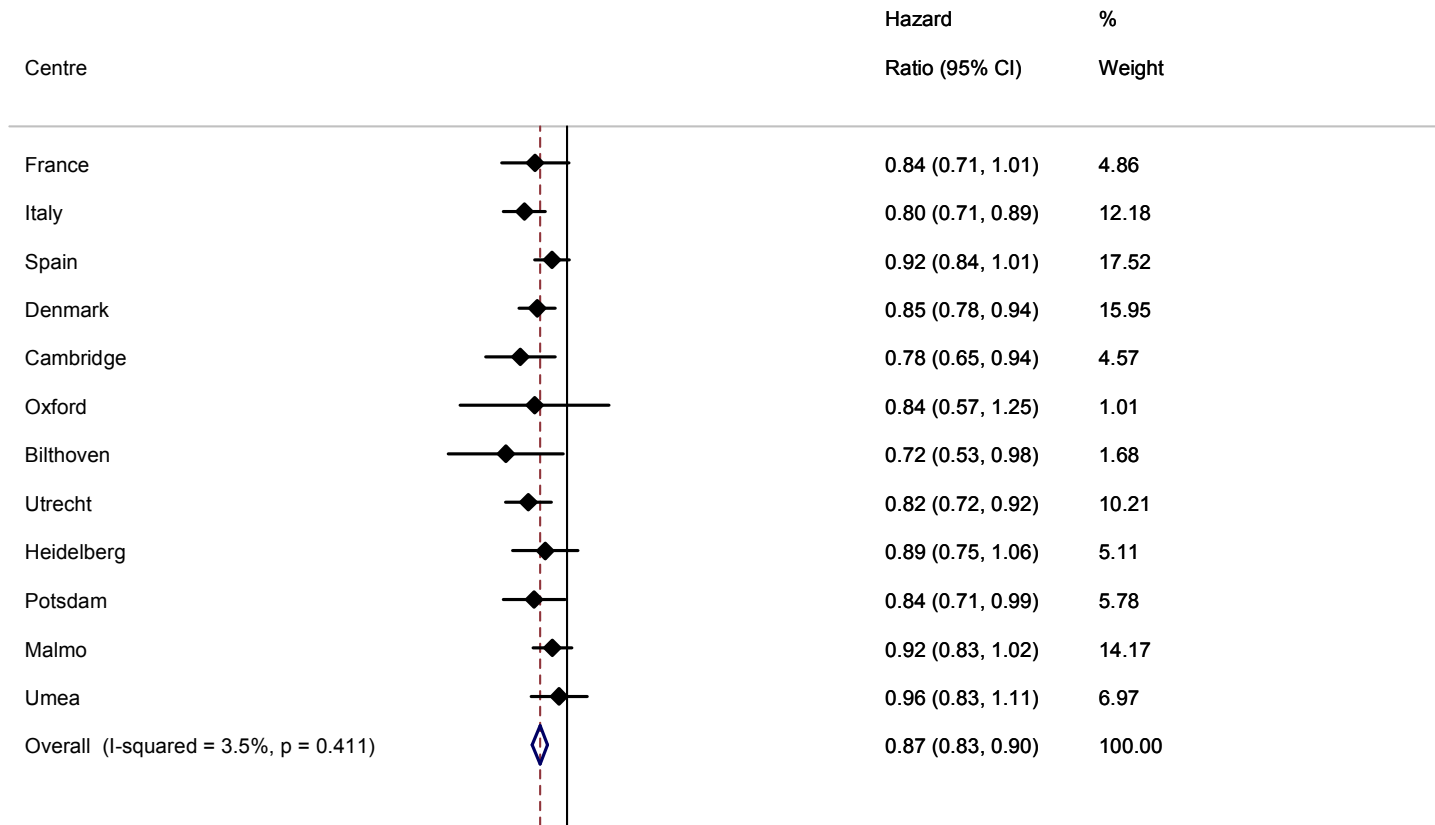

JAMES V. NEEL
*Department of Human Genetics,
University of Michigan Medical School,
Ann Arbor, Mich.*

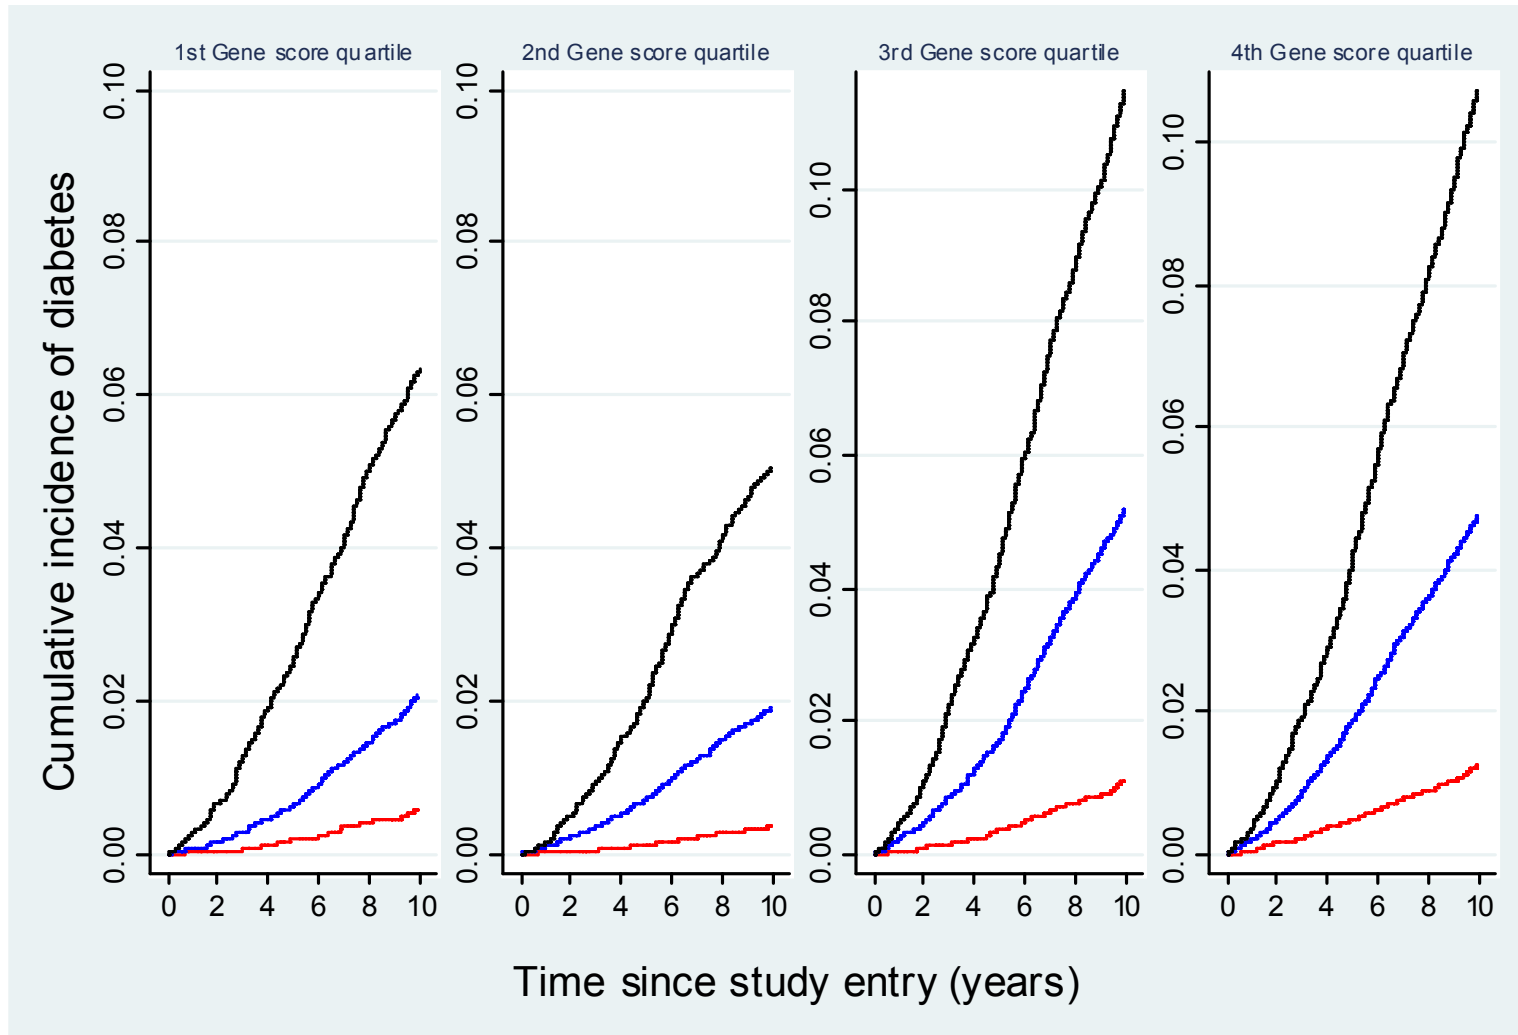

- EU funded nested case-cohort study within EPIC Europe Study
- Large
455,680 individuals at baseline
- Sufficient elapsed time
12,403 incident cases of T2DM
- Diet/Physical activity
- Stored blood
- Exposure heterogeneity

Physical activity and risk of T2DM

Incidence of diabetes by BMI and GRS

Key issues

- **Understanding the process of evaluation and the funding mechanisms**
- **Contributing to the framing of the call**
- **Advanced preparation**
- **Fit with strategic priorities**
- **Professional system for grant preparation**
- **Structure of the consortium**

- **Integrated project**
- **Objectives, processes and money**
- **Professional consortium management**
- **Achievable and realistic milestones and deliverables**
- **Good working relationship with scientific officer in Brussels**
- **Management tools – on-line system for managing production of consortium publications**
- **Reporting**
